

## Equipment Available for Hire

**Woolley Park Golf Club, New Road, Woolley, Wakefield, WF4 2JJ**

Woolley Park is pleased to offer equipment for short term hire in line with the terms and conditions below.

Equipment available includes our top of the range Air2G2 Aeration Machine, a 1.2m Vredo SUPERcompact Series Overseeder and a 2.5m Vredo Fairway Seeder.

This machinery is perfect for the maintenance and improvement of golf courses, sports and athletics pitches and other open fine turf areas, including large private lawn areas with good access.

### The Air2G2

Originally designed on US turf, the Air2G2 was winner of the 2015 Sports Turf Managers Association Innovative Award, praised for revolutionising turf maintenance for golf courses and athletic fields.

Installed at Woolley Park 12 months ago, regular use of this state of the art aerating machine has immediately improved drainage by creating larger pore space in our soil subsurface. This has enabled us to be one of the few courses open in our area on some of the wettest days the 2015/16 winter has offered up.

Used on all our 27 greens this self-propelled, hydrostatic drive, air injection machine has promoted excellent root structure. The Air2G2 causes a fracturing effect in compacted rootzones, creating more air space within the soil for deep root growth, which in turn will help in the fight against drought in drier months.

The Air2G2 is available for hire in all seasons, and with the added advantages of no disruption to play and no post use clean up, there is no interference with your venues calendar of events.

Our hire cost is based on use over 18 greens over 2 days and includes

transport to and from your venue\*: Manned £750 plus VAT\*, Unmanned £600 plus VAT (including 1 hour training). For other venue types please request a quote.

\* At the discretion of Rowbottom Ltd, transport further than 20 miles may incur an additional transport charge. The Air2G2 is only available manned at private residences.

For more information, a demonstration or to hire, please contact [enquiries@woolleyparkgolfclub.co.uk](mailto:enquiries@woolleyparkgolfclub.co.uk)

### **The 1.2m Vredo Overseeder**

Perfect for small fine turf areas, including tees and greens, and sports pitches with limited machinery access, our 1.2m Vredo SUPERcompact Series is a front runner in the fine turf sector. Following hire use for a number of years we have added a brand new model DZ 212.035 to our fleet this spring. This light machine offers agile and accurate overseeding, a double row of discs giving 35mm spacing put seed in direct contact with the soil at specific and variable depths.

With a single pass operation providing almost total seed germination, due to the highly accurate seed dosage mechanism, this machine causes no disruption to play and leaves the surface perfectly flat.

Our hire cost includes transport to and from your venue\* and basic training: Unmanned, without tractor\* £500 plus VAT per day.

\* At the discretion of Rowbottom Ltd, transport further than 20 miles may incur an additional transport charge. Tractor size 30-50 horsepower required for use.

For more information, a demonstration or to hire, please contact [enquiries@woolleyparkgolfclub.co.uk](mailto:enquiries@woolleyparkgolfclub.co.uk)

## The 2.5m Vredo Fairway Seeder

Vredo Overseeders are world renowned for their quality, performance and accuracy. This machine has been part of our fleet for a number of years and is used on all our 27 fairways for grass regeneration. It is well suited for any larger open areas and pitches with good machinery access.

Equipped with the famous and proven Dual-Disc System, seed is placed in a V-shaped slit, at a variable depth, directly in contact with the soil for maximum germination rate. A

compaction roller ensures all slits are closed and a level playing surface re-established.

This machine is only available for hire within 20 miles of Woolley Park Golf Club and is provided manned with a tractor at a cost of £650 per day plus VAT.
